Patient Safety Reporting (PSR)

What It Is...

PSR delivers a standard patient safety event web-based reporting form for the Military Health System and analytic tools to help reduce the frequency and severity of Medical safety events.

Key Features and Benefits

- Web-based forms to capture and track patient safety events
- Anonymous or user identified reporting
- Standard and ad hoc patient safety reports
- Systematic methodology to capture and aggregate patient safety data
- Supports the overall mission and goals of the Department of Defense's Patient Safety Program

Highlights

- In June 2011, PSR completed a world-wide full deployment phase with onsite and Web-based training in an unprecedented 8-month period.
- In first quarter FY 13, PSR will release its first major upgrade with new features that include:
 - Modernized Graphical User Interface (GUI)
 - Expanded Medication Event Reporting features, and a Customizable Reports Dashboard
